

Building Automation Systems and Controls

Cordjia Capital Projects Group's building automation systems and controls team can provide you with one resource to enhance and maintain your facility's entire performance from the equipment to the controls and software. We provide custom automation solutions for both new and existing buildings, with the objective of achieving higher efficiency and system performance.

Energy savings can have a vast impact on your bottom line and we ensure that your Heating, Ventilation, and Air Conditioning (HVAC) systems run to their most efficient and full potential. Building Automation Systems centered on building occupancy schedules can also reduce your electrical demand by controlling your lighting and HVAC needs. This translates into customer satisfaction and lower business operating costs.

Our building automation systems and controls team concentrates on the following elements:

Cost Efficient Systems

- Providing the design and implementation of a system that is right for your building and your budget no matter whether it is an existing building or new construction

Programming Upgrades

- Maximizing efficiency and cost savings through the use of a detailed analysis of options available to upgrade your existing systems

Maintaining System Efficiency

- Providing a complete analysis of your existing systems in order to develop recommendations and implement a maintenance schedule to keep your systems running at peak efficiency

Building Automation and Control Systems

- Building Automation and Control Systems (BACS) ensure you have well managed and energy efficient buildings, BACS can be programmed so they may be controlled from anywhere in the world via the internet

we don't just deliver solutions | we lead them™
