

## Critical Infrastructure Vulnerability Assessment and Monitoring

### Overview

Cordjia Capital Projects Group offers advisement on risks and opportunities related to security vulnerability, operation and safety of critical infrastructure systems supporting international sporting events. We provide an independent, single-point of contact for comprehensive risk management advice.

### Critical Infrastructure Vulnerability Assessment & Monitoring

The tangible benefit that we can bring to you is quickly identifying the security vulnerability, operation and safety risks and opportunities associated with stadiums; training facilities; hotel accommodations; and transportation logistics, and presenting implementable strategies to reduce your risk profile. We achieve this by performing the following tasks:

- Onsite venue evaluation of critical infrastructure vulnerability risks and opportunities and delivery of an effective and comprehensive physical security and risk mitigation strategy specific to:
  - Capabilities, procedures, and practices of the venue management team, security personnel, external support organizations and vendors
  - Life and fire safety requirements and systems
  - Power generation systems
  - Public address system with mass override capability
  - Fire alarm systems
  - Broadcast OB van infrastructure and media cabling systems
  - Closed caption television systems (CCTV)
  - Mechanical and electrical distribution systems
  - Uninterrupted power supply systems
  - Communications and information technology systems
  - Field lighting controls and systems
  - Scoreboard controls and systems
  - Potable water systems
  - Sanitary systems
  - Public utility electrical systems
  - Stadium control room integrated systems
  - Structural systems (if necessary)
