

Facility Energy Performance Management

Our Facility Energy Performance Management solution assists organizations to develop sustainable facility capital plans that progress performance goals based on financial, energy, environmental and social dimensions.

Our solution empowers organizations to optimize their business results by creating and aligning a strategy for their built environment with their core mission and business objectives. Our solution is built around proven engineering and economic models that inform lifecycle investment planning and budgeting decisions.

Benefits

Built-in energy performance data analysis and key performance indicators, energy auditing, building systems engineering algorithms, and building lifecycle cost models form the foundation for improving the financial, energy, and environmental performance of buildings.

We help you manage and reduce the risks of maintaining fiscally and environmentally responsible operations and budgeting and enables our clients to:

Reduce costs of planning energy investments for building portfolios	Merge energy investment with overall capital planning process	Match capital funds with energy savings opportunities	Improve energy and emissions performance	Report on energy investment performance to stakeholders
---	---	---	--	---

Results

Our Facility Energy Performance Management solution produces tangible means, such as reports and measurements, for clients to develop a capital plan that progresses performance goals based on financial, energy, environmental and social dimensions, with the following results:

Financial Management	Communication & Quality Management	Risk Management	Customer Relationship Management
<ul style="list-style-type: none"> • Improve Decision Making • Provide justification • Identifies all capital costs • Assures expenditures are focused on need 	<ul style="list-style-type: none"> • Confirms assets are being managed effectively & efficiently • Improves accountability of asset performance • Provides ability to benchmark 	<ul style="list-style-type: none"> • Evaluates probability and consequences of failure • Focuses on continuity of service • Addresses inter-relationship between assets 	<ul style="list-style-type: none"> • Enhances direct communication with customers • Improves comprehensive understanding of service requirements and alternatives • Improves customer satisfaction
