

Facility Portfolio Performance Management

Our Facility Portfolio Performance Management solution assists organizations to develop sustainable facility capital plans that progress performance goals based on financial, energy, environmental and social dimensions.

Our solution empowers organizations to optimize their business results by creating and aligning a strategy for their built environment with their core mission and business objectives.

Our Facility Portfolio Performance Management solution produces tangible means, such as reports and measurements, for organizations to develop a capital plan that progresses performance goals based on financial, energy, environmental and social dimensions. It is comprised of three customizable solution elements with the following results:

Facility Capital Planning Management	Facility Energy Performance Management	Facility Security Performance Management
Quantify and analyze system renewal costs	Reduce costs of planning energy investments for building portfolios	Enable security planning and analysis on industry standards
Implement consistent capital planning process across divisions and process	Merge energy investment with overall capital planning process	Provide consistent method for approving security plans
Collaborate on planning/budgeting decisions using standardized data and process	Match capital funds with energy savings opportunities	Reduce cost of planning security investments
Compare lifecycle capital requirements to funding sources and levels	Improve energy and emissions performance	Merge security investment decision-making with overall capital planning process
Identify funding risks and opportunities	Report on energy investment performance to stakeholders	Report on security investment performance to stakeholders

we don't just deliver solutions | we lead them™
