

Local Project Administration Solution

Our Local Project Administration (LPA) solution provides LPA Certified professionals to assist municipalities in completing all phases of Maine Department of Transportation (MaineDOT) projects. We ensure that all State and Federal requirements involved with transportation projects are met. If Federal funds are to be used our LPA Certified professionals will work through the many Federal highway process requirements to ensure all the necessary documentation and protocols are delivered. We work directly with the municipalities and their designated representatives through the completion of the project.

Benefits of Local Project Administration

Benefits of Our Services

Our Local Project Administration solution provides municipalities with a single point of contact for the comprehensive management of their transportation projects. We serve only your interests and with a flexible suite of services we can provide full service or enhance the skills of your in-house team. Through this collaborative process our solution achieves maximum benefit to you in cost, quality and function. The Federal requirements for environmental, right-of-way, and utilities as well as project design, construction, and quality assurance standards must be strictly adhered to in order to guarantee the Federal funds remain in the “participation” status.

we don't just deliver solutions | we lead them™
