

Operational Health Check
for
Integrated Mechanical, Electrical, Automation, and Ancillary Systems

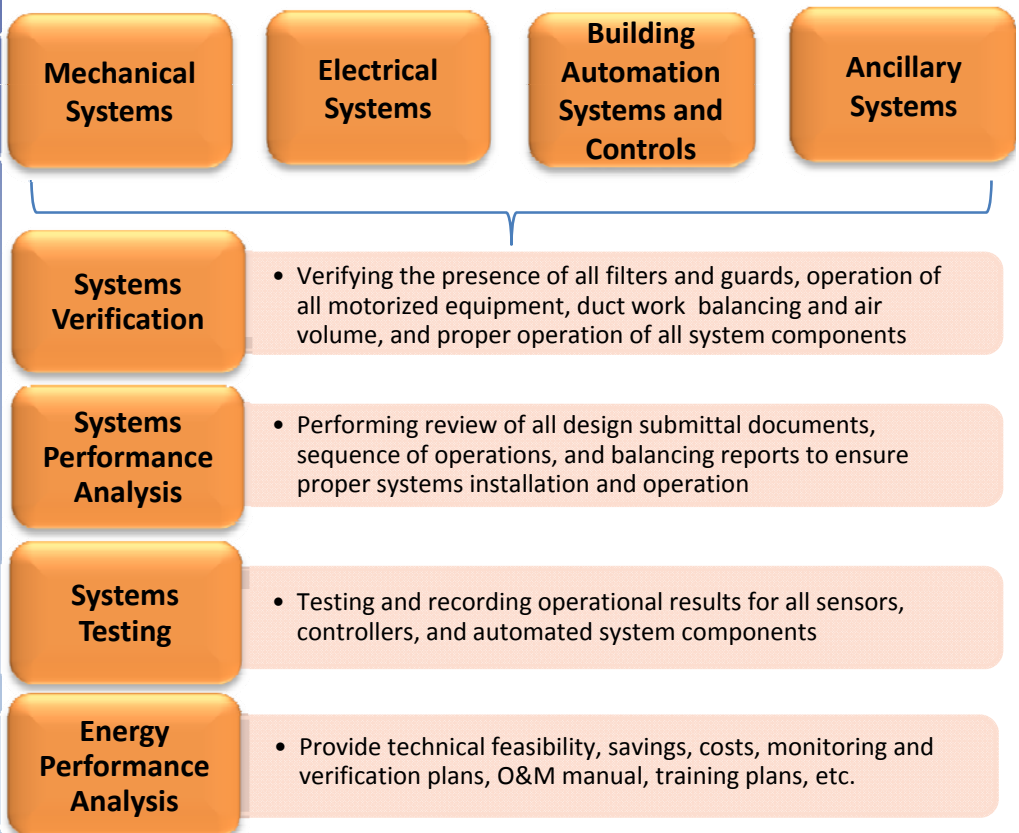

Integrated mechanical, electrical, automation, and ancillary systems carry an inherent variety of risks throughout their lifecycle, and you are not always convinced that your critical systems are going to achieve the expected results. Waiting too long to act could mean waiting until it's too late to get the system back on track.

By bringing in experts from Cordjia Capital Projects Group, you can have an accurate and unbiased status of your systems quickly and inexpensively.

What will an Operational Health Check do for you?

Our integrated mechanical, electrical, automation, and ancillary systems operational health check services usually pay for themselves and then some. There are several tangible benefits our experts can bring to you – **Return on Investment (ROI), Cost Savings, and Lower Operating Risk.**

Our services consist of the following elements:

Your small investment in an operational health check far outweighs the cost of systems failure due to schedule and budget overruns.

we don't just deliver solutions | we lead them™
